## Education Toys for Kids

Teams will step into the role of creative designers, tasked with inventing playful, accessible learning experiences for children. Using starter kits as raw materials, they'll prototype imaginative tools that spark curiosity and joy.

Each stage introduces design challenges — from reimagining math as a game to crafting inclusive storytelling formats.

Progress is tracked in real time, with points awarded for originality, thoughtful design, and collaborative spirit.

The activity becomes a dynamic innovation lab rather than simple assembly, encouraging innovation, personalization, and teamwork.

## Team Benefits:

Encourages creativity and problem-solving.

Strengthens collaboration, communication, and time management. Builds a sense of purpose by working toward a meaningful social impact.

Turns teamwork into a fun, competitive, and rewarding experience.

## The Impact on Children

The toys created during the program are more than playthings — they are educational materials designed to enrich learning and self-confidence.

## Objectives for Children:

Encourage thoughtful personalization: Each child receives materials that feel unique to them, reinforcing their value.

Foster belonging: Toys and messages help children feel recognized and supported.

Boost self-worth and confidence: Carefully chosen items make children feel seen and appreciated.

Provide practical tools for learning: Beyond emotional impact, the toys support academic and creative growth.

Make the experience memorable: Connecting learning with joy and care leaves a lasting impression.
