THE AURORA LEGACY

The Game

In the Aurora Legacy, players take on the role of investigators and try to stop a gang of criminals. This involves deciphering codes in video messages, researching the internet and cracking logic puzzles. This game is designed for teams to play together remotely, but it can also be played in conference rooms.

The precious Aurora Diamond has been stolen. The criminal Fox Gang seems to be behind the robbery, but has covered their tracks very well.

The only chance of success is an encrypted database found in the fox's lair. Apparently he has stored the instructions to his henchmen where the diamond should be hidden after the robbery.

The Objectives

Players get to use their intellect creatively to decipher the cryptic clues of the fox as a team in order to find out where the Aurora Diamond could be.

The Benefits

- Maintains engagement through an interactive story
- Induces outside the box thinking
- Participants learn of own and others strengths
- Encourages interaction and idea sharing
- Great for a low key fun team building event
