

ONLINE INVESTIGATORS

The Game

Bringing last year's best selling program The Investigation Affair online, team members each play from their location to compete against time and other teams to find clues, discover evidence and solve cases to earn their detective certificates. This game will start with a visual online meeting room introduction before teams can input solutions in unison via our app to score points. Through-out the activity, teams can see the live scoring from the other teams and game statistics can be shown.

The Objectives

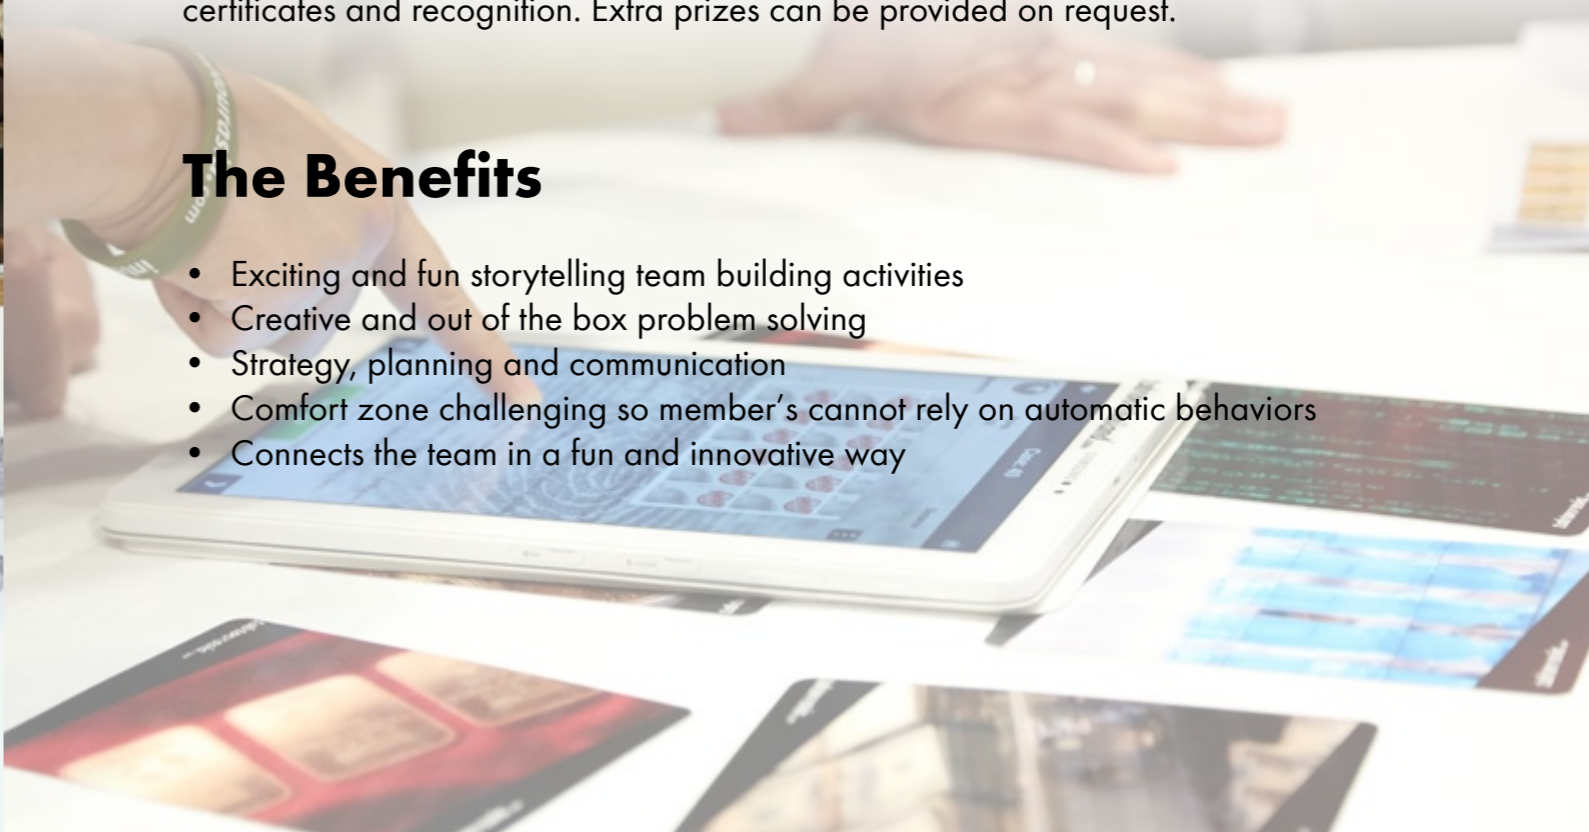

Teams are formed before entering the Crime Academy to compete to become leading investigating officers. After app login, your challenges will appear. Crime cases need to be solved by solving team puzzles, interaction with other teams, making targeted team pictures or videos, and doing research. There will be 25+ crime cases requiring various investigation techniques. Each player must stay up to date with the team as only unified answers will give points. Live scoring stops a little before the program ends so that a gripping showdown can be demonstrated.

The Best

Teams with the most points earned by solving cases will receive their detective certificates and recognition. Extra prizes can be provided on request.

The Benefits

- Exciting and fun storytelling team building activities
- Creative and out of the box problem solving
- Strategy, planning and communication
- Comfort zone challenging so member's cannot rely on automatic behaviors
- Connects the team in a fun and innovative way
